REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art does not show or fairly suggest the claimed invention of an optical arrangement having the claimed structure and claimed limitations, wherein a rejection under 35 USC 102 or 103 would be improper. Please particularly note the combination of claimed elements and claimed limitations, including the eight lens elements having the recited claimed limitations, especially the indicated radius of curvatures for the first lens and the seventh lens, and wherein particular ray heights are achieved between the first and second lens elements and between the fifth and sixth lens elements. Therefore, in light of the Applicants' arguments and/or amendments, the claimed invention is considered to be in condition for allowance as being novel and nonobvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following are U.S. Patents directed to microscope objective systems having at least eight lens elements, but do not read on the claimed limitations of the instant invention:

Fujimoto et al

U.S. Patent 6,747,804 B2

Kurata

U.S. Patent 6,822,805 B2
